

Intermountain Medical Center - Doty Education Center

OWNER	- Intermountain Health Care
TYPE OF PROJECT	- Multiple Room Integrated Audio Visual Systems
LOCATION	- Murray, Utah
GENERAL CONTRACTOR	- Okland Construction
APPROXIMATE VALUE	- \$750,000

THE SYSTEM'S BASIC FUNCTIONS INCLUDED THE FOLLOWING:

- Eight Classrooms**
 Each classroom has an integrated audio/visual system with multiple AV inputs, video projector, touch panel control, and wireless microphone capability. The rooms have the capability of auto-combining in combinations of two or three.
- Boardroom**
 The boardroom has an integrated audio/visual system with multiple AV inputs, video projector, touch panel control, and wireless microphone capability.
- Auditorium**
 The auditorium can subdivide into two smaller auditoriums, each with its own integrated AV system. A larger AV system takes over when they are combined. In addition, the auditorium has an integrated video conference system.
- Central Control**
 Central Control can route audio and video from any of the above rooms to any other. It can also control the routing of audio/video from 11 operating rooms in another building to any of the above mentioned rooms over a fiber optic network. In addition, it can monitor and control any component in any of the rooms above.
